- If washing in the dishwasher, a slight discoloration to the inner pot and accessories may occur. This is cosmetic only and will not affect performance.
- Any other servicing should be performed by Aroma® Housewares.

TO COOK RICE

1

Using the provided measuring cup, add rice to the inner cooking pot.

2

Rinse rice to remove excess starch. Drain.

3

Fill with water to the line which matches the number of cups of rice being cooked.

4

Place the inner pot into the rice cooker.

5

Close the lid securely.

6

Plug the power cord into a 120V AC wall outlet.

NOTE

- Before placing the inner cooking pot into the rice cooker, check that it is dry and free of debris. Adding the inner pot when wet may damage the rice cooker.

HELPFUL HINTS

- If you misplace the measuring cup, a $\frac{3}{4}$ standard US cup is an exact replacement.
- To add more flavor to rice, try substituting a favorite meat or vegetable broth or stock. The ratio of broth/stock to rice will be the same as water to rice.
- For approximate rice cooking times and suggested rice/water ratios, see the "Rice/Water Measurement Table" on **page 8**.

TO COOK RICE (CONT.)

Press the  button to turn on the rice cooker.

Press the WHITE RICE, BROWN RICE OR SUSHI RICE button, depending upon the type of rice being cooked.

For better results, stir the rice with the serving spatula to distribute any remaining moisture.

When finished serving rice, turn rice cooker off by pressing  and unplug the power cord.

NOTE

- Brown rice requires a longer cooking cycle than other rice varieties due to the extra bran layers on the grains. BROWN RICE on this rice cooker allows extra time and adjusted heat settings in order to cook the rice properly. If it appears the rice cooker is not heating up immediately on BROWN RICE, this is due to a low-heat soak cycle that precedes the cooking cycle to produce better brown rice results.
- Rice should not be left in the rice cooker on KEEP WARM for more than 12 hours.

TROUBLESHOOTING

Because rice varieties may vary in their make-up, results may differ. Below are some troubleshooting tips to help you achieve the desired consistency.

Rice is too dry/hard after cooking.	If your rice is dry or hard/chewy when the rice cooker switches to keep warm, additional water and cooking time will soften the rice. Depending on how dry your rice is, add ½ to 1 cup of water and stir through. Close the lid and press the WHITE RICE button. When rice cooker switches to keep warm, open the lid and stir the rice to check the consistency. Repeat as necessary until rice is soft and moist.
Rice is too moist/soggy after cooking.	If your rice is too moist or soggy when the rice cooker switches to keep warm, use the serving spatula to stir the rice. This will redistribute the bottom (moistest) part of the rice as well as release excess moisture. Close the lid and allow to remain on keep warm for 10-30 minutes as needed, opening the lid and stirring periodically to release excess moisture.
